

# VA CAUSED, INDUCED, VETERAN SUICIDE

VA STOP MURDERING OUR VETERANS BY SUICIDE.

MEET THE MONSTER OF SOCIALIZED  
HEALTHCARE, DEPT OF VETERANS AFFAIRS.

SUICIDE ISNT COWARDLY.  
WANNA KNOW WHATS COWARDLY?  
TREATING SOMEONE SO BADLY  
THAT THEY WANT TO END THEIR LIFE.

VA Induced Suicide is a form of psychological warfare that is caused by psychological mistreatment, torture and abuse. **Psychotic drugs or ‘neuro-toxin-poisons’** magnify emotional effects by shutting down mental judgment much like alcohol does and because of that one bypasses fail safes against self-destruction and without abandon resorts to suicide; all one hears in his or her head is **“just do it!!!”** Under drugged coercion, there are no ‘checks and balances’ to stop self-destruction i.e. - when a VA doctor who refuses to treat a suicidal person abusively screams, “go ahead and kill yourself - I don’t care.” **Suicide is not cowardly; cowardly is when someone abuses and mistreats a sick and troubled person so badly that s/he chooses to end his or her life. That describes Nazi & Dept of Veteran Affairs cowardly, employees in toto.** VA misuses neuro-toxin drugs, psychological abuse, torture, and many more evil means to murder veterans via **induced suicide.** Yes, it is a form of deliberate murder. A sadistic, therapist first provokes and creates a hostile ‘therapeutic environment’ by doing whatever irritates and disturbs an already troubled patient the most. An example is harassing someone already suffering PTSD and on edge to suddenly stop and say that ‘you seem tense,’ which psychologically intensifies a patient’s state via mental projection and autosuggestion. Then she returns to her needling while looking for more of her victim’s weak areas. Should the patient ask her to stop, she makes excuses and aggravates harder once the victimizer has discovered additional sore spots to hammer harder pushing the patient into snapping. Another insidious tactic is ‘Gaslighting’ a patient into knee jerk reactions playing with his or her reality; when asked to stop MHC provider denies her actions then claims that the patient is imagining things. Her denials only confirm the very behavior that the VA provider claims to oppose. The therapist will deny, minimize and play more crazy making head games until pressing her patient into suicidal psychosis. Should her victim react aggressively, VA provider calls security then blame shifts to her prey before security removes s/he as at fault; then the provider flags the person’s records as dangerous, hostile & ‘Do Not Treat.’ Anyone flagged as that must check in and out with security and be escorted everywhere during all visits. Always, it is her victim’s fault; nobody believes a vets side if s/he is even allowed to voice it; for, socialism or VA is never wrong. Once released, a confused and distressed veteran suicides at first opportunity to stop the mental distress and a crazy, screaming, therapist’s voice ruminating in his or her head. **A number of reasons exist for this mental mistreatment.** 1) To frustrate a vet from seeking VA help and relieving the agency of liability; 2) because of provider incompetence and employee sadistic attitudes towards vets in toto; 3) to retaliate against their boss, agency or the vet; 4) retaliation against a veteran for imagined injustices such as ‘whistleblower’ complaints about poor or no care and being placed on secret ‘Do Not Treat’ list as a non-compliant patient, because s/he has reported employee abuse to Veteran Advocate, or to higher authorities in Washington DC, etc; 5) to encourage a high liability ‘Suicidal’ veteran into leave VA and go to ‘private’ free clinics; 6) use VA suicide hotline, which transfers all liability to vendors in both cases; 7) to induce a suicidal veteran to ‘go ahead and kill yourself, your life is not worth it and I don’t care, etc.’ An individual already at the end of his or her proverbial rope, then suicides either shortly after leaving or while on campus. **‘VA INDUCED SUICIDE’ is the reason for parking lot, in clinic, in hospital and all other on campus veteran suicide epidemic.** **In the book and movie ‘One Flew over the Cuckoos Nest’ exists a scene**

**that perfectly examples this whole issue. ‘Nurse Ratchet,’ which translates into ‘Wretched’ induces suicide in one to of the asylum’s, drugged patients. Same as Hannibal Lector does in ‘Silence of the Lambs’ to a fellow asylum inmate, both died by induced suicidal, autosuggestion or projective identification that is intentionally used to cause harm to a victim. This phenomena is well known among mental health industry and used by evil, psychotics to murder by ‘INDUCED SUICIDE.’ Otherwise known as psychological warfare and mental bullying, VA uses projective identification to murder veterans via induced suicide.**

VA outsources high-risk patients, which is about all of us, blame-shifting all liability onto vendors should something go wrong. Dead vets cannot talk and reveal that they were abused, harassed, and drugged into ‘INDUCED SUICIDE’ by cruel, evil, abusive Veterans Affairs employees. OIG inspections after the fact always side with VA and its ‘Kangaroo injustice’ system supporting agency against wrongdoing.

Incriminating records are destroyed, altered, and such to meet OIG decisions. **24**  
**veterans died by suicide on VA campuses in an 18-month span between 2017-2019 after VA MHC mistreatment. Many more did so offsite during that period after undergoing VA abuse. Dept of Veteran Affairs murders veterans via ‘VA INDUCED SUICIDE.’**

Up until now, those criminals have gotten away literally with murder with few consequences!! However, US Supreme Court has all but removed VA and employee exceptions against facing consequences for their criminal actions granted by Feres Doctrine. Recent changes allow veterans and their families to file class action suits, individual malpractice, tort wrongful death and criminal suits against VA & employees under Federal Tort and constitutional laws, - everything VA employees do these days is CYA – cover their asses and pass the onus anywhere else possible against suffering onus for company and employee misbehavior. Up until recently, VA and employees had total immunity against prosecution for crimes up to and including murder. One reason VA suicide hotline does not answer calls or places vets on hold and then disconnects and similar sandbagging is it got bit when something went wrong and faced multi-million dollar wrongful death suit. Should a vet manage to get through to a crisis councilor, first question is do you have a gun. If so, they call the police and transfer onus for a ‘crazy & armed’ veteran to them. **It is all about avoiding responsibility and liability not about helping vets. The last thing a troubled individual needs when seeking help is a SWAT team all over the lawn and breaking into his or her home as if they were attacking a terrorist cell in Beirut. Nearly always it ends badly for the veteran.** This ruse is to discourage veterans from seeking help at all from VA!!! Then VA has no liability and claims dead vets do not seek MHC help while keeping all those millions for suicide prevention to spend on employee bonuses, perks, and political pork! When I reported crisis line ‘hold please then disconnect’ first thing the clinic MH provider said was “it is not our fault and blame-shifted their crisis line vendor”...the Ft. Worth, TX clinic PACT nurse during pre-appointment questioning indifferently replied, “I am sorry to hear that” and continued her script. VA only wants to keep the MHC budget without any responsibility for helping vets while passing onus and their work off to someone else. That is another reason for veteran suicide epidemic in addition to aforeswitten causes. I underwent all of the above including a back room hostile, forced therapy, MHC session by a stuffed shirt, fresh out of school ‘sleep disorder,’ PhD posing as a suicide ‘therapist.’

The point was to discourage me from ever seeking VA help again. She never even asked my why I was suicidal. She just brutally hammered away until achieving her agenda. It worked but I survived to write and warn others of this criminal, psychological form of murder via '**VA INDUCED SUICIDE.**' If I had of still been taking those horrible 'mind worm' neuro-poisons that they initially prescribed, I would have not survived. As it were, I endured almost a year in and out of dark, suicidal depression and two failed suicide attempts. Where VA is being caught is when vets tell their families, spouses, or leave with them hand written records, journals, and such detailing their abusive MHC sessions, and the family sues VA for wrongful death. **Ink on paper, handwritten records posthumously hold up in court same as a live witness, and support survivor testimony. Allowing vets to use constitutional tort laws instead of VA's Kangaroo injustice system is posthumously granting them justice for the first time in US history!!** The very evil that has kept that US criminal socialist agency in business for over a century is now its undoing. Will not be long before PTB say what is the point of VA; privatize and outsource it completely to give vets real choice. With so many of us already using PVT sector healthcare, VA has no purpose except as another useless-eater, bureaucracy, and failed socialist government welfare and jobs mill. Socialism fails 100% of the time everywhere it is tried. Over 96% of veterans never use VA. Of that 4% that do, 100 commit suicide daily sending a protest written in veteran blood to America and to escape VA hell-care. WW2 did not defeat Nazis, which stands for National Socialism. The cult immigrated to America and formed corporations as VA to continue their wickedness. For all the harm VA does - goodbye and good riddance.
